WHAT IS KLOTI ?

Kloti is an online shopping application. This application aims to reduce shopping time and enable people to try on clothes without going out.

WHY KLOTI IS NECESSARY ?

✓ Easy Accessibility

✓ Away From Disease Risk

✓ Saving On Time

✓ Testability For Products

- ❑ Customer can try the product using just the phone.
- ❑ The order is delivered the same day.
- ❑ Offers job opportunities to small companies.
- ❑ All products are laid in front of the customer with a single click.

What Happens After Kloti ?

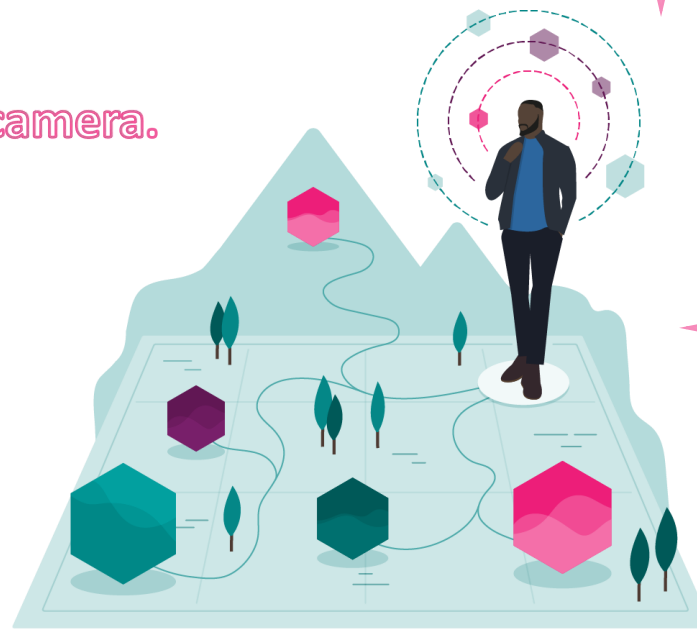

Solution

Developing this application:

★ Allows you to try on the outfit using the camera.

★ It ensures that the order arrives within the same day.

★ Finds your location via GPS and brings the product you want through the closest location to you.

★ It minimizes contact with people and thus reduces the risk of disease.

★ Allows small companies to earn money.

★ Allows us to see the clothes you want through the product catalog.

Amazon	Online Shopping	Web/Mobile Based	To provide the shopping need around the world.		
Getir	Online Shopping	Web/Mobile Based	The biggest goal of Getir is to fit the grocery shopping in 10 minutes, which would allow people to spend more time on their own even if they go to the market, pick it up and come home.		
IKEA PLACE APP	Online Furniture Shopping	Mobile Based	IKEA Place lets you virtually 'place' furnishings in your space.	Not used in our country 	

IKEA PLACE APP

The Most Important Difference Of Kloti

- Augmented reality (AR) involves overlaying visual, auditory, or other sensory information onto the world in order to enhance one's experience.
- The AR technology we use , allows users to try the products they choose while shopping online.
- Thus, the user's worry that the product does not fit the body is eliminated.

Potential Risks

- Although it provides security well, cyber attacks can be made.
- If the user does not update the application, the application may become slow and inefficient.

Conclusion

- As a result, we will be able to shop more efficiently because this app uses the AR technology we developed by examining some shopping applications and because it provides fast delivery.
- In addition, this application will appeal to many people because it can work on operating systems such as IOS and Android.
